Matías Gabriel Picón

B.S. in Information Technology | Semi-Senior Full Stack Developer

PROFESSIONAL EXPERIENCE

Semi-Senior Full Stack Developer
Aug 2024 – Present

Bitwise – Grupo Sancor Seguros

- Design and develop enterprise insurance applications using **.NET** on the backend and **React / Vue.js** on the frontend within Agile teams (**Jira**).
- Manage source control and CI/CD workflows in **GitLab**, enforcing strict code quality and static analysis standards through **SonarQube**.
- Participate in production deployments across **IIS** and **OpenShift (Kubernetes)**, coupled with application performance monitoring in **Dynatrace**.
- Proactively lead technical R&D, architectural improvements, and cross-team engineering initiatives beyond core role responsibilities.

Full Stack Developer
Aug 2021 – Aug 2024

Superintendencia de Seguros de la Nación (SSN)

- Built and maintained core web applications in **.NET (Framework & Core)** backed by **SQL Server** and **Entity Framework Core**.
- Developed web platforms with **Razor**, designed **RESTful APIs**, built mobile solutions in **Kotlin**, and engineered **Python ETL** data pipelines.
- Assumed technical coordination responsibilities starting in 2022, driving system architecture, stakeholder requirements gathering, **GitLab CI/CD** pipelines, and legacy modernization.

EDUCATION

Computer Science (Licenciatura en Ciencias de la Computación)
University of Buenos Aires (UBA) — 2025 – Present

B.S. in Information Technology (Artificial Intelligence Track)
Universidad de Palermo (UP) — 2022 – 2023

Associate Degree in Systems Analysis
ORT Argentina Institute — 2020 – 2021

PROJECTS & APPLIED ENGINEERING

Espresso – 1st Place Santander Bank Award

Affordable, plug-and-play IoT Intrusion Prevention System (**IPS**) appliance engineered for non-technical users. Empowers small businesses and households to actively defend Wi-Fi networks without enterprise hardware or specialized security staff.

Highlight: 1st Place in Banco Santander "Undergraduate Thesis Award 2023" – Read UP Interview.

Stack: .NET, Python, Scapy, Bash, Linux, Raspberry Pi

Rocket Telemetry Ground Station – GitHub

Modular asynchronous ground station for experimental sounding rockets. Acquires high-frequency binary LoRa frames over serial links, verifies packet integrity via **CRC-16/CCITT-FALSE**, dynamically decodes declarative YAML schemas, persists to **SQLite/CSV**, and streams live metrics over **WebSockets** to a high-contrast mission dashboard.

Stack: Python (asyncio), LoRa RF, CRC-16, SQLite, WebSockets, Canvas JS, Arduino

ARM64 Edge Server, SDR & Homelab Automation – GitHub

Self-hosted edge infrastructure running on **Raspberry Pi (ARM64)** with **Docker** containers, Software-Defined Radio (**SDR / auto_rx**) atmospheric telemetry reception, **n8n** workflow automation, local LLM inference (**llama.cpp**), and a custom **Telegram** network/system monitoring bot in Python and C++.

Stack: Linux (Debian ARM64), Docker, Python, C++, SDR, n8n, Systemd

Open Source APIs & Full-Stack Apps – Repositories

Built **MozoDigital** (contactless restaurant ordering platform with REST API + mobile client), **ZoteTheMighty-API** & **Mozambique-API** (Python REST services), **Calendar Checker** (Google Sheets automation), and algorithmic solvers for **Advent of Code** (Python / Jupyter).

Stack: Python, JavaScript, REST APIs, SQLite, Git

TECHNICAL SKILLS

Backend & Languages
C#, .NET Core / Framework, ASP.NET, Entity Framework Core, Python (asyncio, ETL, Scapy), C++, Bash, Kotlin.

Frontend & Web
React, Vue.js, JavaScript (ES6+), Razor, HTML5, CSS3, WebSockets, Canvas API.

Data & Storage
SQL Server, SQLite, Relational Modeling, Query Optimization.

DevOps, Cloud & Observability
OpenShift (Kubernetes), Docker, GitLab CI/CD, IIS, AWS, SonarQube, Dynatrace, Linux (Debian/ARM64), Jira.

IoT, Hardware & Embedded
Raspberry Pi, Arduino, LoRa RF Telemetry, Network Security (IPS), SDR.

LANGUAGES

Spanish: Native

English:
- Reading & Writing: **Advanced**
- Listening: **Advanced**
- Speaking: **Conversational**

FEATURED HIGHLIGHTS

AI in E-Commerce
AWS, Mutt Data & Trafilea (2024)

Competed in an intensive hackathon building cloud solutions on AWS and strengthening applied AI and data analytics skills.

OpenSpace Competition
Academia Exponencial & Satellogic (2020)

Competed in engineering a **1U CubeSat** nanosatellite designed to be integrated and launched alongside a Satellogic satellite.

TED-Ed Speaker
TED-Ed Argentina (2018)

Delivered a talk titled *"Space Exploration: The Final Frontier"*, highlighting aerospace milestones and the importance of scientific curiosity.
